

3M™ Digital Signage for Libraries

Maximize the effectiveness of your communications

3M™ Digital Signage is a simple-to-use dynamic communication platform that can help inform and educate your community about the unique services and events that your library has to offer. 3M provides a complete turnkey digital signage system that allows a broad offering of media and visual formats for more effective and dynamic communication to your patrons and students. 3M Digital Signage features an easy-to-use web application that allows you to manage and schedule the content for your media players. Simply upload your multimedia files to our secure portal. Then drag-and-drop your files onto your player schedule. The players will begin to display the content to your patrons within minutes after you create the schedule. You can even create a schedule days, months or even years in advance.

Your 3M Digital Signage network will be installed by trained 3M Technicians with the same attention to detail that you have come to expect from 3M-Trained Technicians to take the worry out of an installation by helping to ensure that your system is working properly.
