

3M™ Conversion Station

Fast, portable conversion to RFID

As a component of the 3M™ RFID System, this station provides a quick, easy solution for converting library materials to RFID technology. Featuring a touch-sensitive screen, optical barcode scanner and RFID reader, this self-contained station rapidly reads barcodes, converts the information and dispenses 3M™ RFID Tags. The station doesn't require a connection to an automated circulation system, and because it's designed to be self-contained on a portable cart, it works right in the stacks. The sophisticated laser scanner can handle virtually every barcode location and orientation, and a visible scan line helps staff place items correctly. In addition, the conversion station can reprogram RFID tags as items change.

Fast/Easy to Use

- Converts items to RFID quickly and easily
- Lowers labor costs
- Dispenses RFID tags automatically, one by one
- Able to weed and convert your collection simultaneously

Portable/Self-contained

- Works right in the stacks
- Speeds up the conversion process
- Doesn't require a connection to an automated circulation system
- Anti-tip feature

Multiple Features

- Touch-sensitive screen for easy configuration and operation
- Features a barcode scanner and RFID reader
- Converts tags with one simple system
- System can program and reprogram tags

Dimensions

- 18" d x 56.7" h x 30" w
(460 mm x 144 mm x 760 mm)
- Cart on wheels

Energy Profile

100/120 or 200/240 VAC
50–60 Hz
5.0/2.5 A

Weight (Approximate)

160 lbs (72.6 Kg)

UL-Certified

Meets the EU
WEEE and RoHS
Directives
